Dear Ben,

Please find attached your nutritional deficiencies results. The items on this list have indicated a deficiency and needs replenishing in your system. We only report these as they are the ones likely to be causing you the most symptoms. However, your hair sample has been tested against all 80 nutrients.

The nutritional information found next to each nutrient is important, as a good balanced diet along with a healthy lifestyle can boost the immune system and reduce your intolerance levels. The nutrients that have shown as deficient in your system can easily be improved. Simply try and add in one or two of the recommended food items to your diet each day. Although it may be easier to use a vitamin supplement, it is always better to get your nutrients from a fresh source, as this will enter your body much faster.

Kind Regards,

Test Results

Biotin

Sources - Almonds, Artichoke, Avocado, Banana, Black eyed peas, Brazil nuts, Onion, Peanuts, Pecans, Raspberries, Soy, Strawberries, Sweet potato
Symptoms - Hair loss, Dry scaly skin, Cracking in corner of the mouth, Fatigue and Depression

Chromium

Sources - Bread, Brown rice, Meat, Broccoli, Mushrooms, Green beans
Signs of deficiency - Anxiety, low energy levels, chronic fatigue, muscle weakness, mood swings.
Body use - It is an essential part of metabolic processes that regulate blood sugar and helps insulin transport glucose into cells, where it can be used for energy
